EDUCATION

BTech in Computer Science and Business Systems

Aug 2022 – May 2026

Vellore Institute of Technology, Vellore, India

Coursework: Data Structure & Algorithms, Web Development, Operating Systems, DBMS

SKILLS AND TECHNOLOGIES

AI/GenAI: LLMs, RAG, AI Agents, Agentic AI, Prompt Engineering, Claude, Anthropic API, Agentforce, LangChain, LangGraph

Programming: Python, Java, C, JavaScript, SQL, Apex, HTML, CSS

Frameworks/Tools: FastAPI, Flask, ReactJS, Angular, Node.js, Express.js, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, Git, Docker, AWS, Power BI

Salesforce/Cloud: LWC, SOQL/SOSL, REST APIs, Salesforce Flow, Data Cloud, Marketing Cloud

WORK EXPERIENCE

Software Development Engineer 1 (SDE1) — Accelerize360

Hyderabad, India | Jan 2026 – Present

- Developed enterprise applications using Apex, LWC, JavaScript, SOQL, REST APIs, and Salesforce, building scalable backend services, user interfaces, and business workflows for enterprise clients.
- Worked on Agentforce implementations, developing and configuring AI agents, actions, topics, and instructions to automate client workflows and enable AI-powered interactions with enterprise Salesforce data.
- Contributed to a large-scale Salesforce Data Cloud implementation across 7+ dataspace, building data transformations and processing workflows for customer/lead data, consent management, identity resolution, and data synchronization across millions of records.
- Built automation and integration workflows using Salesforce Flow, Apex, APIs, and external systems to process events, trigger downstream actions, and deliver automated notifications and business processes.

Software Engineer — Reliance Industries Limited

Mumbai, India | May 2025 – July 2025

- Built a web platform (Angular, Node.js) for pipeline & material inspections with scheduling and review features.
- Integrated Power BI dashboards for KPI & site-wise reporting, improving inspection tracking.
- Actively participated in code reviews, and collaborative problem-solving sessions to enhance software quality.

Software Engineer — Astute AI

Vellore, India | Aug 2024 – Dec 2024

- Developed AI-powered applications for e-commerce automation using Python, Flask, Streamlit, and JavaScript, integrating LLM/ML capabilities to automate product content, SEO, marketing, and customer-engagement workflows.
- Built AI/ML pipelines and backend APIs for data processing, model inference, and intelligent content generation, working across experimentation, evaluation, API integration, and deployment of end-to-end AI applications.

TECHNICAL PROJECTS

Behavioral Biometrics Based Integrity Analysis | Python, scikit-learn, Flask, React, Chrome Extension API

- Built a cheating-detection system for LeetCode capturing 58 behavioral features in real time, training Logistic Regression and Linear SVM with 5-fold StratifiedKFold cross-validation to reach F1-score > 0.9, translating model outputs into plain-language suspicion explanations (interpretable reasoning over raw scores)
- Architected the full stack end-to-end: Chrome extension for behavioral capture, Flask REST API for inference, and React 19 frontend on Vercel — delivering real-time, interpretable integrity verdicts

Noisenab | JavaScript, Leaflet.js, MongoDB, HTML/CSS

- Developed a full-stack web application that monitors and visualizes noise pollution using real-time public data and historical datasets, with location-based reporting and map visualizations.
- Used MongoDB to store crowdsourced and preloaded noise data, highlighting urban noise hotspots for public awareness and civic planning.

Tacit AI-Powered Organizational Memory | Next.js, TypeScript, React, Gemini, RAG, Transformers, SQLite

- Built an AI-powered organizational memory platform using RAG, local MiniLM embeddings, cosine-similarity retrieval, and Gemini to answer questions over company knowledge with grounded, source-cited responses.
- Engineered the end-to-end system with Next.js API routes, TypeScript, SQLite, streaming LLM responses, Jira integration, multi-tenant project isolation, and AI workflows for decision extraction, assumption analysis, pre-mortems, and knowledge capture.

CERTIFICATES

- Claude Certified Architect Foundations, September 2026 — Anthropic
- AWS Certified Cloud Practitioner (CLF-C02), August 2024 — Amazon Web Services (AWS)
